

DECEIT

To sigh, yet feel no pain.
To weep, yet know not why.
To sport an hour with beauty's chain,
Then cast it idly by.

AUTO SPEEDERS AT IT AGAIN

The police of this city should take drastic measures to stop the speeding autos that make our streets avenues of danger. Saturday afternoon several autos were seen flying up Second street at a speed that was not far from thirty miles an hour and endangering all traffic in that thoroughfare. If this is not stopped at once it is certain to end in an accident.

Miss Frances Tugle, one of Mason county's progressive teachers was a business visitor in the city Saturday.

Mr. Albert Caproni and Mr. Justin McCarthy, are in Winchester this week.

CUTTING SCRAPE

Two Men Engage in Bloody Battle—Old Trouble Said to Be Cause—Police Officials Arrive in Time to Prevent Murder.

Saturday evening about a quarter of ten E. P. Kelly, section boss on the C. & O., and Morton Humphrey, a farm hand of the county, engaged in a bloody battle in Eitel's saloon. The battle was a termination of some trouble that the men had several years ago and had been brewing for some time.

Kelly it seems had stepped into the saloon to get a glass of beer and meeting Humphrey in the place one word followed another until Humphrey hit Kelly in the face with a beer stein. The police arrived on the scene just in time to prevent a possible murder as both men were fighting like tigers and were doing considerable damage to each other. Constable Fleming and McNamara took Kelly in charge and rushed him to Dr. O. A. Taylor's office where first aid was rendered him. The doctor took five stitches in his face and neck and a large piece of flesh was cut entirely out of his cheek. He was later removed to his home in East Third street. Humphrey was taken in charge by Officers Stewart and Fizer who with Chief Mackey and Officer Bloomhuff took him to the office of Dr. J. H. Samuel where he was mended and later taken to jail by Fizer and Stewart. Following are the stories of both men:

Kelly's story—"I stepped in the saloon to get a glass of beer and met Humphrey in there. I asked him if he was still mad. He said something and asked me what I had my hand in my pocket for. I pulled a piece of money out and said here is what I had my hand in my pocket for. He then hit me in the face with a beer glass. I grappled with him and threw him down. We wrestled about until the police came and took us to the doctor's office. He had threatened me last year and came at me with a knife and Mr. Louis Wolherer stopped him. I don't know why it happened."

Humphrey said—"About four years ago I had some trouble with Kelly and he told me if he ever met me again he would kill me. I have been in Ohio for three years and just came back some time ago. I met Kelly in Eitel's saloon and spoke to him. He commenced to spar with me and as I have been sick and was weak I did not like it. He asked me if I was mad and I told him I was not. He said something and had his hand in his pocket. I thought he was going to stab me and I hit him with a beer glass. We tussled until the police came and took us away, that's all." The men will probably be given a trial before Judge Whitaker today.

FALLS FROM BRIDGE

James Mark, son of Mr. and Mrs. Benjamin Schumacher, of West Second street, while playing Indian was running with a lighted torch and stubbing his toe fell over the bridge spanning Glycerine Hollow and alighted on a bed of rocks some 15 feet below. He cut a deep gash in his head which rendered him unconscious for some time. Dr. Cooper rendered quick aid and dressed his wound after which he was moved to his home.

EXPOSITION PARTY PASSES ON SPECIAL OVER C. & O.

The Governor of Virginia and party who passed through here on a special a few weeks ago bound for the Exposition and other points of interest through the West, passed through here Saturday bound for Richmond, Va. The party which is known as the Richmond Blues, report a splendid trip and are loud in praise of the exposition and everything else that they saw in the glorious West.

MAGISTRATES COURT

Squire Fred W. Dresel fined Robert Watson \$5.15 for being drunk.

Mr. W. E. Arnold, of Danville, Ill., who has been visiting his sister, Mrs. G. R. Valentine, left Friday for Rugles Campgrounds to remain for the rest of the meeting.

Mrs. Maude Farnsworth and two children, Robert and Annie, of Pascagoula, Miss., are visiting her parents Mr. and Mrs. Geo. W. Adair, of West Second street.

It will be to everybody's interest to read Ewan's ad. of the Chenoweth home in this issue of the Ledger.

Miss Elizabeth Potts, of Portsmouth, is visiting Mrs. James Wise of this city.

SPECIAL NOTICE TO CONTESTANTS

In the Great Combination Daily Bulletin and Public Ledger Auto Contest

Campaign headquarters have been established at Ryder's Paint Store, Second street, near Market street, opposite Bee Hive, where the campaign manager will be glad to meet all candidates, receive nominations and give full information regarding the contest to all who call. Both city and country candidates may make this their headquarters during the great auto contest and the office will be open from 8 a. m. till 9 p. m. every day except Sundays.

REGULARS WIN

White Sox Downed in Benefit Game Sunday—Grimes Stars for Regulars

The White Sox fell before the Regulars by the score of 6 to 12 in the benefit game Sunday for Frank "Pat" Jacobs, formerly of both teams, who was injured on the railroad some time ago. The all-around playing of Grimes for the Regulars featured He led both teams in the field and at the bat. The handsome sum of \$65 was realized and after the game was presented to Jacobs, Manager Frost of the White Sox making the presentation. The score:

Innings 123456789—R.H.E.
Regulars...600110400—12-9-2
White Sox...500000000—6-4-4

Batteries—White Sox: Frost, McDonald, Rudy, Dresel. Regulars: Eitel, Dice.
Two base hits—Rudy, Myers, Austin, Grimes. Three base hits—Grimes, Austin, Smart. Struck out—By Eitel 7; by Frost 4; by McDonald, 2; by Rudy, 1. Hit by pitcher—By Eitel, Rudy, Dinger; by Frost, Wilson. Passed balls—Dice, three; Dresel, two. Umpire—Ort. Attendance—300.

BUCANEERS ENTERTAIN WITH BATHING PARTY

The jolly Bucaneers entertained Sunday afternoon and evening with a bathing party. Lunch was served after which the party took a dip in the Ohio. Those who enjoyed the hospitality of the boys were: Misses Nannie Teager, Mary Parker, Miss Smith, of Millersburg, Miss May Vance, of Lexington, Miss Hilda Threlkeld, Mr. and Mrs. Louis Prichard, of Paris, Misses Edith Dickson, Pattie Quaintance, Maude Berry, Evelyn Smith and Frances Geisel. Messrs Emerson and Ernest Ziegler, Harry Miles, Frank Henderson and Mr. Holland.

CRUISED TO BOULES FERRY

Sunday a jolly party cruised to Boulders Ferry where they spent the day with Messrs. Tom Hefferman and James Buckley, of this city, who are there on their vacation. The trip was made in the Helen D., the trim little motor boat of Mr. Frank Burgoyne. Those who made the trip were Messrs. Frank Burgoyne, Ashby Burgoyne, Edward Archibald, John Collins, James Hefferman, John Hefferman, John Ryan and Bob Shepard. They report a fine trip.

ATTEND BALL GAME

The following fans motored to Frankfort Sunday to see the ball game there between the locals and the team of that city which resulted in favor of the latter by the score of 7 to 2. Messrs. Thomas Russell, Claude Watkins, Gordon Sulser, Chas. Rosenfeld, Kelly Luman, John McAuliffe, William Weis, Sam Alper, George Davis, Geo. Diener and others.

BRUCE LYONS

Mr. Bruce Lyons, aged 82 years, died at his residence near Orangeburg Saturday after a lingering illness. He is survived by his wife. Burial today from the home. Interment in the Mt. Olivet Cemetery at 2:30 o'clock.

HELD ON SERIOUS CHARGE

Lena Holland, aged 18, is in the county jail, having been placed there Saturday afternoon by Constable Ben Fleming, on a serious charge. She threatens to expose several persons in this vicinity.

OFF FOR DETROIT

Messrs. Frank Lynch, Oliver Greenlee, Tom Ellis and George Childs, left Sunday afternoon for Detroit, Mich., where they will be employed in the big auto works of that city.

CARD OF THANKS

I am deeply grateful and wish to thank the Fans, the Players and those who participated in the game of ball played for my benefit.

FRANK M. JACOBS.
Mr. William Dooley is in DeKalb, Ill., this week.

A GREAT REDUCTION

In going over our stock we find that we are OVERLOADED, and have decided to REDUCE STOCK, and it goes at cost.
This space will not permit us to list it all. One great bargain is 100,000 feet of excellent grade of OAK SIDING. This goes at \$2 PER HUNDRED. All other yard stock greatly reduced.

Don't miss this opportunity to get what you want in lumber and building material at the lowest prices ever known in Maysville. Terms at this reduced price are CASH.

WESTERN AND SOUTHERN

Life for This District Makes Record In Contest

This district of the Western and Southern Life Insurance Company made a record for the week ending July 19th when 16 men wrote applications for \$56.57 in premiums being an average of 3.53 9-16 per man. This is the largest result ever accomplished in this district. The best previous to this time was \$30.20 against \$56.57 this week and if this district does not win the penant it will mean that the one that does is going some.

STOUDER-HOEFLICH

Cards have been received by friends and relatives in this city announcing the marriage of Miss Marion Sarah Stouder to Mr. James Lynn Hoeftlich, to take place at the home of the bride in Eldred, Florida, on August 3rd.

Miss Stouder is the accomplished and attractive daughter of Mr. and Mrs. Horace G. Stouder, of Eldred, Florida, and Mr. Hoeftlich is the son of Mr. and Mrs. R. K. Hoeftlich of this city. Mr. Hoeftlich was very popular here before he moved to Florida and his many friends wish him and his bride to be a long, happy and prosperous life.

Mr. Nannie C. Wilson and her charming little granddaughter, Miss Martha Lovel are spending the week in the Queen City.

Miss Marguerite Bramble returned Saturday from Park's Hill where she was attending a school of Methods in Sunday School work.

D. HECHINGER & CO.

D. HECHINGER & CO.

AUTO ACCIDENT

Saturday afternoon about 3 o'clock an auto owned by Mr. James Nichols ran into a horse and buggy in West Second street near the intersection of Court street. The auto being on the left hand side of the street was the whole cause of the accident. Luckily the occupants of the buggy escaped injury.

Mr. Charlie Short, of New York City, formerly of this city, was visiting friends in this vicinity Sunday.

PORTRAIT PAINTER

Mr. Cornelius Hankins, of Nashville, Tenn., one of America's greatest portrait painters, is spending a few weeks in Mason county, visiting relatives. While here he will paint life size portraits for several prominent people. This is an excellent chance to have your portrait painted by an artist. His works are famed as he has painted in the State Capitol at Tennessee and museums, libraries and residences. Mason county is fortunate to have such a distinguished gentleman in her midst.

TOO MANY HOLIDAYS

As Life's unending stream flows on and weeks and years are here and gone, we keep on adding holidays to turn us from our beaten ways. We hardly pass the groundhog stage, whose dope upsets the weather sage, till kids and youths and maidens fair scent new excitement in the air, and lo the mails are filled with junk that shows an arrow, shot kerplunk, right through a bleeding paper heart, which rips our feelings all apart. From January twenty-nine until the feast of Valentine it seems that every other day is something special, in a way. Ere we strike our wonted stride the woodchuck takes a peep outside and we must lock the store or shack and watch him till he moseys back. Upon the 12th we greet the morn, reminding us that Abe was born. Let's pass the 14th quickly o'er—I think we mentioned that before—and take a little forward peek to what will come another week, when, solemn as a billy goat, with hatchet pinned upon a coat, we go parading down the streets or hike it home for noonday eats to stuff the kids with that old saw how Georgie squared it with his paw. And so through winter, spring and fall. I wont attempt to name them all. About the time we settle down some holiday upsets the town and we who fain would plug away and earn our little mite per day are forced to stop and celebrate and some fool thing commemorate. The stores are shut, the banks are closed and business truly discomposed, the carrier didn't bring your mail, you couldn't even get in jail because the marshal's shed his blue and he is celebrating too. And still a lot of crazy jays are yelling for more holidays, and what is worse we must admit, they often get away with it. But what's the use to drift along? You get the burden of my song; it means that we have hit a gait we must alter soon or late or ere a dozen years have fled the calendar will all be red.

An optimist is merely an ex-pessimist with his pockets full of money, his digestion in good condition and his wife in the country.

You can't always judge a man's generosity by the amount of money that he gives to his wife.

We read that one may hypnotize a cobra by pressing its neck with the fingers. One may also hypnotize a rattlesnake by biting its head off.

When the devil is weary he introduces a woman who is a little lonely to a man who is a little bored, turns on the moon—and then takes a holiday.

This is the season of the year when the fond parent commences to understand things and regret what he said about the school teacher.

The cashier of a Buffalo bank went crazy from counting money, which makes us feel how perfectly safe our own mind is.

There may have been no summer in 1816 as a contemporary says, but the one for 1915 promises to make up for it.

Sign of peace: American bankers commence to worry over European credits.

Those Belgians

When the Germans finally entered Belgium a native of Liege made himself obnoxious to one troop by his constant loud talk about the brave defense. Finally the commander summoned him.

"Now you've boasted about enough," he said; "we can't listen to you any longer. I'll give you your choice; swear allegiance to the Emperor or be shot."

Considerably subdued, the offender pondered. "Well," he decided, "I don't want to die, so I guess I'll swear allegiance." And he took the oath. "All right," said the officer, "now you're one of us. You can go and come as you like."

The man walked toward the door and was passing out when suddenly he turned. "Say," he exclaimed, "didn't those Belgians give us a hell of a fight?"—Everybody's.

He Bit

A club of eccentric young men had for one of their rules that on Tuesday evenings any man who asked a question in the club-rooms which he was unable to answer himself, should pay a fine of ten dollars.

One evening McLoughlin asked the following: "Why doesn't a ground-squirrel leave any dirt around the top of his hole where he digs it?"

After some deliberation McLoughlin was called upon to answer his own question. "That's easy," said he; "the squirrel starts at the bottom and digs up."

"All very nice," suggested a member, "but how does he get to the bottom?"

"Well," answered McLoughlin, "that's your question."

GOOD HOUSEKEEPING IS THE ROAD TO ECONOMY.

Mahogany and Rosewood

The beauty of mahogany and rosewood lies in the rich color and fine grain of the woods and this is not enhanced by carving or by elaborate decorations. Therefore beauty of outline and perfection of finish is the result furniture manufacturers strive for when working in these materials.

Rosewood is from a tree called by West Indians, Amyris; it does not attain the great size of the mahogany and its color is not red but a dark, richly veined brown.

To keep furniture made from these woods in condition it is sufficient to rub them gently with a soft cloth when they need dusting.

The beauty of these wonderful woods is their hardness which makes them so durable. Naturally a hard wood, they are especially seasoned before they are used and some factories keep choice pieces of them for years in the process of seasoning. If a rosewood or mahogany piece becomes scratched, scorched or defaced, it can be restored by a cabinet maker to its original beauty. This is not always the case with veneered furniture. Dampness, heat or much jarring will often raise the veneer and it cannot always be replaced.

A delicate Colonial tilt-table of rosewood veneer was used for serving tea until the veneer commenced to blister and peel. It was sent to a furniture restore shop. Week after week went by but it was not returned and the owner called on the workman who showed her the process of restoration and said he had been compelled to wait until able to match the ancient wood. He had matched it in the case of an old moldboard, a beauty in itself, and was painstakingly removing the veneer from the old piece and transferring it to the other. This explains, in part, why it is so expensive to have old treasures renewed by professionals.

If you admire mahogany and rosewood pieces as they so well deserve, and have some of this furniture to restore, a very good way to do this is to follow the example of the Shackletons; they employed the most expert workman they could hear of to restore and polish some of their "finds" and then they stayed by the workman and took notes with eyes and ears and after a few days they were able to do the work themselves.

MEAT AND DAIRY PRODUCTS IN AMERICAN TRADE, 1914-15.

Washington, D. C.—Imports of meat and dairy products into the United States in the ten months preceding May 1 last, were three times the value of those for a like period two years ago and seven times those of the entire fiscal year 1905. This movement, according to the records of the Bureau of Foreign and Domestic Commerce, Department of Commerce, first assumed large proportions in the fiscal year 1914, following the transfer of meats to the free list. Very recent months, however, have reversed the upward trend, since February, March and April show much smaller imports than in those months of last year or when compared with earlier months of the current fiscal year.

In the ten months ending with April imports of meat and dairy products aggregated 38 million dollars in value, meats representing two-thirds of the total. In 1913-14 the same months gave a total of 28 million and in 1912-13, 12 million dollars. Prior to 1910 the total never reached 10 million dollars, having been five and a quarter million in 1905 and 2 million in 1895.

Our imports of meats are mainly supplied by Argentina. Ten months of the current fiscal year brought 112 million pounds of fresh beef and veal from Argentina, and from 10 million to 15 million pounds each from Canada, Uruguay, Australia and the United Kingdom.

The United States still exports far more meats than it imports, for although there have been record-breaking arrivals in the last two years, exports have been even larger. Returns for ten months indicate that the value of meat and dairy products exported this year will once more attain the 200 million dollar level that marked the decade prior to 1909.

A study of the official figures shows that while the imports have consisted chiefly of beef and mutton in the primary stages of preparation, the exports have included considerable quantities of bacon, hams, lard, canned and preserved meats, and other meat products in a more or less advanced state.

In fresh beef there is now a large movement both into and out of the country. The large outward movement, however, is a development of recent months. Over 25 million pounds of fresh beef were exported in April and more than 100 million pounds in the period from August 1, 1914, when the European war began, to the end of April, 1915; while the aggregate for the three-year period ending June 30, 1914, was only 29 million pounds.

It is also apparent that the United States pays less for the meats which it buys than it receives for those it sells. In April we imported 8 and a half million pounds of fresh beef

valued at 93-4 cents per pound f. o. b. countries of origin. In the same month we exported 251-2 million pounds valued at 14 cents per pound at the domestic ports of shipment. For the ten months ending with April, 1915, the imports and exports were 165 million and 102 million pounds, respectively, valued at 91-4 cents per pound for the imports and 121-2 cents per pound for the exports.

She can keep within the allowance her husband gives her if she can have a charge account at a dry goods store.

ARE YOUR KIDNEYS WELL?

Many Maysville People Know the Importance of Healthy Kidneys

The kidneys filter the blood. They work night and day. Well kidneys remove impurities. Weak kidneys allow impurities to multiply.

No kidney ill should be neglected. There is possible danger in delay. If you have backache or urinary troubles, Begin treating your kidneys at once; Use a proven kidney remedy. None endorsed like Doan's Kidney Pills.

Recommended by thousands. Proved by Maysville testimony. Lang Stevens, Maysville, says: "My kidneys were out of order and I had backache, which extended into my kidneys. The kidney action was irregular. Doan's Kidney Pills had been used in my family, so I gave them a trial. They helped me greatly."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Stevens had. Foster-Milburn Co., Props., Buffalo, N. Y.

OIL-MIXED CONCRETE FOR DAMP-PROOFING

Experiments In the Department of Agriculture Demonstrate Its Value In Many Kinds of Buildings

Washington.—After extensive laboratory and service tests the Department of Agriculture has secured results which appear to establish definitely the value of oil-mixed concrete for damp-proof construction. Detailed results of these tests, which were carried on in connection with the work of the Office of Public Roads, are contained in the new bulletin, No. 230, of the Department, entitled "Oil-Mixed Portland Cement Concrete." Briefly summarized, the conclusions to be drawn from them are that the admixture of certain mineral oils in small proportions, not to exceed 10 per cent of cement used, does not lessen the tensile strength of mortar; that the decrease in the comparative strength of mortar and concrete is not serious; that concrete mixed with oil takes much longer to set hard, perhaps twice as long, but that the increase in strength is nearly as rapid in the oil-mixed material as in the plain concrete. The use of oil does not make the concrete impervious to heavy water pressure, but it does make it practically non-absorbent under low heads.

The value of oil-mixed concrete is said to be particularly great in the construction of basement floors and walls, watering troughs, cisterns, barns, silos and in all parts of concrete construction that are to be made damp-proof.

The oil should in no case exceed 10 per cent of the weight of the cement and for the most part, 5 per cent is all that is necessary. Since a bag of cement weighs 94 pounds, 4.7 pounds of oil, or about 2½ quarts, should be added for each bag of cement used in the mixture. The sand and cement should be first mixed with the proper amount of water into a stiff mortar, to which is added the correct amount of oil, and the whole mass again thoroughly mixed until all traces of oil have disappeared. Particular care should be taken to insure that the oil is thoroughly incorporated in the mixture and the time of mixing should be practically double that when oil is not used. For this reason a continuous mixer should not be used in oil-cement-concrete work, as it is difficult with this type of machine to increase the time of mixing sufficiently.

The kind of oil is also important and the following technical specifications are suggested in the bulletin in order to prevent the use of certain oils which might tend to impair the strength of the mortar or the concrete.

1. The oil shall be a fluid petroleum product and shall contain no admixture of fatty or vegetable oils.
2. It shall have a specific gravity not greater than 0.945 at a temperature of 25 degrees C.
3. It shall show a flash of not less

Insuring a Family

THIS consumptive girl lived in a little house with her parents and four brothers and a sister. When the visiting nurse of the city called upon her she found the whole family in danger of contracting tuberculosis from the young woman through ignorance of the proper methods of caring for the patient. The nurse instructed the members of the family about the preparation of the girl's food and the care of her room, so as to give her every chance for life. Most important of all, the nurse showed how the disease—tuberculosis—is spread from one person to another through the spit and spray from the mouth of a consumptive. They were taught that all of the expectorations should be caught in paper boxes or napkins and burned. Those instructions practically insure the lives of the other members of the family.

than 150 degrees C. by the closed-cup method.

4. When 240 degrees C. of the oil is heated in an Engler viscosimeter to 50 degrees C. and maintained at that temperature for at least three minutes, the first 100 cc. which flows out shall show a specific viscosity of not less than 15 nor more than 30.

5. When 1 part of the oil is shaken up with 2 parts of hundredth normal caustic soda, there shall be no emulsification, and upon allowing the mixture to remain quiet, the two components shall rapidly separate in distinct layers.

For practical use the addition of oil will be found particularly useful in the construction of basement floors and walls. Many of these now in existence are continually damp and such a condition may be remedied by the application of an oil-mixed mortar coat to the old surface. A mortar composed of one part of cement and two parts sand and containing 5 per cent of oil should be sufficiently non-absorbent for this purpose.

Watering troughs and cisterns made of oil-mixed concrete should also prove of considerable practical value in the conservation of water. In the construction of barns, where oil-mixed concrete is used, the interior will be noticeably drier than when ordinary concrete is used. Owing to their durability, cleanliness and resistance to fire, concrete barns are becoming more and more popular, but they suffer from the disadvantage that during a long beating rain the side walls are inclined to absorb moisture, which ultimately penetrates into the interior. The addition of oil to the extent of 5 per cent of the weight of cement in the concrete used in the side walls obviates this objection. Barn floors can also be constructed in the same way with advantage. A damp-proof floor is warmer because of the lack of evaporation from its surface, and it is also more sanitary than an ordinary concrete floor because of its non-absorbent character.

There are, of course, any number of other types of buildings and structures of all sorts in which oil-mixed concrete may be used advantageously, or, if this is not necessary, a coat of oil-mixed mortar may be applied effectively.

Attention is called, however, to the fact that extreme care in proportioning, mixing and placing the concrete is absolutely necessary if the addition of any water-proofing agent is to be of value. The process of mixing oil with concrete has been covered by a public patent so that any one is at liberty to use it. The methods of using this material are discussed more fully in the bulletin already issued.

COMMERCIAL GRADING OF CORN

Grades Fixed By the Secretary of Agriculture Widely Adopted.

Washington, D. C.—The grades for commercial corn which were promulgated by the Secretary of Agriculture on January 2, 1914, and which went into effect on July 1, 1914, have been generally adopted throughout the corn belt and in the cities in that part of the United States and at the Gulf ports but are not in use in the cities along the Atlantic seaboard. The grades include the classification of white, yellow and mixed corn into six grades and "sample" and have been recognized by the Grain Dealers' National Association, the state associations affiliated with this organization, the state grain inspection department of Washington, Minnesota, Illinois, Missouri, Kansas, Oklahoma and the Department of Commerce and Industries of the state of South Carolina.

In order that the producers, dealers and consumers throughout the United States may more fully understand the correct interpretation of the government corn grades, somewhat detailed explanations are given in the new bulletin of the United States Department of Agriculture, No. 168, "Grades for Commercial Corn." The classification which was made by the secretary and became effective July 1, 1914, divided commercial corn into six classes and "sample," the classification being based on the moisture content of the corn, the color, the amount of damage, foreign material and cracked corn. It also included eleven general rules for making this classification. Necessarily even with the definite limits for the more important factors, points will arise on which the best experts may differ. For this reason, the bulletin gives somewhat in detail methods of securing a representative sample from bulk corn, mixing samples for detailed analyses, the size of samples, sieves for screening, moisture tests, determining the amount of damage of corn, foreign material and cracked corn. It also includes a color plate which represents, as nearly as possible, the various types of kernels from the standpoint of color. This bulletin may be had free upon application to the United States Department of Agriculture, Washington, D. C., as long as the supply lasts.

Before the day of steel for writing purposes, England was importing 25,000,000 quills each year for pens.

During the last year 840 creamtoms took place in England, as against 855 for the previous year.

British imports of fruit amount to more than \$50,000,000 annually.

LITTLE IDEAS BRING BIG RESULTS.

Anthony Blatner and the Fire Engine

Up to the beginning of the sixteenth century the only means for fighting fire was the use of buckets, and naturally the destruction was invariably great. The earliest mention of any description of fire engine with which we are at present acquainted, occurs in the building account of the city of Augsburg, in Germany, in the year 1516. They were made by Anthony Blatner, a goldsmith, of Friedberg. They were known as water syringes and in many respects had the appearance of a huge syringe, which was so placed in a cart of water that it was able to throw a stream of water to the height of ten feet or more.

There was very little improvement in the Blatner method for a hundred years, or until 1657, when a more elaborate engine was constructed by John Hautsch, of Nuremberg, which was mounted on a sledge ten feet long by four feet broad, which was drawn by two horses. This machine was worked by twenty-eight men and is said to have been able to throw a jet of water one inch in diameter to the height of eighty feet.

It was not until toward the close of the sixteenth century that the hand squirt was introduced into England, and they were extensively used in the great London fire in 1666. Soon after the commencement of the seventeenth century the Londoners perceived the convenience that would arise from these squirts to a movable cistern, and applying their power through the means of a lever, and the first engine thus obtained was considered a great mechanical achievement.

That these engines were but imperfectly constructed, and deficient in strength, we learn from a recorded circumstance, that three of them which were taken to extinguish a large conflagration on London bridge in 1633 and were then considered "such excellent things, that nothing that was ever devised could do so much good, yet none of these did prosper, for they were all broken."

Toward the close of the seventeenth century M. Duperrier, in France; Leupold, in Germany, and Newsham, in England, introduced almost contemporaneously fire engines of a very improved description, which soon came into general and extensive use. The most novel and important features of these engines consisted in the employment of an air chamber, which rendered the stream of water continuous and uniform, together with the equally important and valuable addition of the flexible leather hose, of any requisite length, invented by the brothers Jan and Van de Helde, and first tried by them at Amsterdam in 1672.

These machines enable the stream of water to be conveyed a considerable distance from the engine and directed upon the flames with the greatest precision and effect. In the engines of Leupold, Duperrier and some others one working cylinder only was employed with an air vessel. These machines very much resembled the common garden engine of the present day. Newsham used two cylinders and, while various convenient alterations and improvements have been made in the details of this engine, the character and mode of construction adopted by Newsham were used up to the time the present style of steam engine was introduced.

The first practical steam engine was made by John Braithwaite about 1829, but, though it proved useful in various fires in London for several years after that date, it was objected to by the men of the fire brigade and its use was abandoned. A generation later, however, steam fire engines began to come into vogue.

At first these engines were drawn by horses to the scene of the fire and it is only within the past ten years that the motor-propelled fire engine has come into use. Such engines have the advantage that they can reach a fire much more rapidly than the horse-drawn vehicle. The present motor engines are made with a capacity to deliver 1,000 gallons of water a minute, or even more, but the size that can deal with 400 or 500 gallons a minute are probably those most commonly used.

Up to within a half century ago volunteer fire departments were depended upon for protection, but in 1865 they were generally abolished and the paid fire department took their place, with very much more effective results, paid firemen undergoing a course of training that renders much greater satisfaction as well as efficiency.

A British automobile concern has built a truck and trailer especially for the transporting of aeroplanes.

"GREAT BRITAIN."

Washington, D. C.—"A survey of the coast geography of the British Isles shows some things of tremendous interest when considered with reference to the blockade undertaken by the Germans, the first serious blockade ever attempted against the United Kingdom," begins a bulletin just issued by the National Geographic Society, which sketches a few of the difficulties in the way of maintaining an effective blockade of the many-harbored, sea-encircled nation. The bulletin continues:

"Great Britain is a land of harbors and highly developed ports. Its foreign commerce clears from more than 120 seaports, that are situated upon every sea washing the islands. To shut off English commerce with other lands would require an almost impossible sea-strength. Moreover, besides its wealth of widely scattered harbors, the United Kingdom has a particularly irregular coastline, which would serve to greatly multiply the labors of a blockader.

"Broken by rocky headlands, bays and deeply penetrating inlets of the sea, the English coastline alone stretches for a distance of 2,350 miles. To the south, upon the English channel, lies the great seaport of Plymouth, Southampton, Portsmouth, Brighton and Dover; to the east, toward the North sea, are the ports of London, Harwich, Great Yarmouth, Hull and Newcastle, and to the west toward the Atlantic and the Irish sea, are Bristol, Cardiff and Liverpool. Hundreds of smaller ports are sprinkled in between these great harbors of world-fame.

"Of these English ports, Liverpool is said to have the best developed harbor in the world; more coal is shipped from Cardiff than from any other seaport; Grimsby is the fishing capital of the world, and London is more intimately connected with the ports on every sea than any other harbor. England has expended with freehanded foresight in the improvement of her seaports, and so the war finds her with adequate harbor facilities upon every hand, with dry docks and shipyards in every more important harbor, with equipment to carry on a great foreign trade from more than 100 different points.

"Scotland is a still more baffling problem to an intending blockader. Probably its most striking feature is the irregularity of its coastline, and its coast upon the east is shielded by an intricate mass of bold, rocky islands. Though much smaller in area than England, Scotland has a coastline of 2,300 miles, or one mile of coast to every thirteen square miles of area. Leith, Dundee and Aberdeen are important ports upon the North sea in the east; Inverness sends its shipping to the north, and Glasgow, with its famous shipbuilding works and vast foreign trade, lies toward the North channel and the open Atlantic. Few places in Scotland lie more than forty miles from the sea and smaller ports dot the entire coastline.

"Ireland's greatest ports, Belfast and Dublin, are situated upon her east coast on the Irish sea. The restless breaking of a rough Atlantic over the rocky needles of her western coast

has retarded the development of commercial harbors there.

"Limerick, upon the river Shannon, gives Ireland an important Atlantic harbor, while Queenstown is an outlet in the south and Londonderry in the north.

"With its more than 6,500 miles of coastline, and its well-developed harbors all along the way, the United Kingdom presents a problem of extreme difficulty to any power intending to maintain blockade against it."

Newfoundland is said to be without reptiles of any character.

The Indian hemp plant offers a substitute for opium.

CANDY, BREAD, CAKES AND ICE CREAM

Everyone knows that we sell all these things, and yet, why is it that our goods are so popular?

Trace our success back to the beginning and you will find that "QUALITY" is the point that stands out above all others.

That's why we are known of, and will continue to be known of, as

TRAXEL'S

EXTENSIVE IMPROVEMENTS FOR COTTON MILLS

Undaunted by the costly fire of some months ago the January & Woods Company are to make extensive improvements to their cotton mills on West Second street.

Plans are now being drawn by J. E. Serrine, of Greenville, N. C., covering a \$50,000 dye house and annex to the mill which when completed will make this plant a finer institution than before the fire. The January & Woods Company is noted for its progressive spirit and these improvements are only in keeping with their progressive and up-to-date policy.

Superintendent Hopkins of the local Western and Southern Insurance office acted as Superintendent of the Third Street M. E. Church yesterday.

MAYSVILLE WINS

Local Team Trims Frankfort In An Exciting Game Saturday—Manager Devore Features with Timely Base Hits

The Maysville Ohio State League team won the second game of the season Saturday when they took the ten inning contest from the Frankfort Lawmakers by the score of 3 to 1. The hitting of Manager Josh Devore featured. He got three safeties in four trips to the rubber and the pitching of McGraynor of the locals, was extremely good in pinches.

New York-Chicago, postponed.

TRACTION ACCIDENT

Saturday the traction engine belonging to Mr. James Lurdys of the county while climbing the steep hill on the Kenton Station pike near the farm of Mr. Robert Downing slid back down the hill and in the mix up that followed Mr. Lurdys injured his foot. Failure of a brake was the cause of the accident.

KILLS MAD DOG

There was quite a bit of excitement Friday afternoon on the Fleming Pike caused by a strange acting dog which had all appearances of being mad. Officer Dudley Flzer was summoned and soon shot the dog.

The World's Lowest Priced Knight Motored Car

THIS announces the greatest achievement in the history of the automobile business.

Practically every royal and titled family in Europe owns one or more Knight motored cars.

The Willys-Knight has the same advantages and is just as efficient as those costly European Knight cars.

The Knight is the automobile motor that revolutionized the entire motor car industry of Europe.

The Knight type motor is the nearest approach to 100% efficiency.

As we build more cars in a single week than most European manufacturers build in a whole year, we are able to utilize every modern manufacturing economy.

The Daimler of England, the Panhard of France, the Mercedes of Germany, the Minerva of Belgium—in fact practically all of the costly European cars—are equipped with the famous Knight type motor.

This motor differs from other motors in that where all others deteriorate with use, this improves; to all others carbon is harmful, here it is beneficial; size for size it has more power.

That is why our price is so much less.

The Willys-Knight, in our opinion, has the least vibration and is the smoothest, quietest and most economical car made.

And these are the motor cars that cost from \$4,000 to \$8,000 each!

It has no noisy poppet valves; no noisy cams; no uncertain valve springs; no troublesome valves to grind; practically no wearing parts.

Have your demonstration at once. Immediate deliveries.

Specifications:

60-horsepower Knight motor; cylinders cast on bloc, 4 1/2" x 4 1/2" stroke; High tension magneto ignition

114-inch wheelbase; Full-floating rear axle; Underlying rear springs 34" x 4" tires; one-third rear

Detachable rims; one extra Color: Royal blue with ivory strip; gray wheels, nickel and polished aluminum trimmings

Vacuum tank gasoline system; Electric starting and lighting system; Control buttons on steering column; Headlight dimmers

One-man motor top; Rain-vision, ventilating type windshield; Magnetic speedometer
